

BRINGING CERTAINTY TO AIR EMISSIONS MEASUREMENT AUDITS AND EVALUATIONS

Regulatory compliance is the baseline - system health, data confidence, and continuous improvement are where real value lies. With almost 20 years of expertise in air quality monitoring, Global Analyzer Systems helps industrial facilities across Canada meet and exceed requirements with confidence. We're not just checking boxes; we're enhancing your air monitoring program with comprehensive, expert-driven evaluations and knowledge sharing.

CEMS AUDITS

Annual audits aren't just a requirement, they're a chance to strengthen your entire emissions monitoring program. Required by Environment Canada (EPS 1/PG/7) and the Alberta CEMS Code, these audits must be performed by qualified, independent experts. Here's what you can expect with Global:

- ✓ Independent, full-spectrum QA/QC evaluations
- ✓ Detailed audit reports with actionable insight
- ✓ Ongoing support to implement improvements
- ✓ Review of reports, records, and logbooks
- ✓ Recommendations for system and data accuracy improvement

AMD EVALUATIONS

Every three years (at minimum), Alberta's Air Monitoring Directive (AMD 2016) requires a full review of your monitoring and reporting program. NAPS (National Air Monitoring Program) also recommends a review of ambient air monitoring plans every 5 years. But a good evaluation does more than just satisfy regulation. At Global, we dig deeper to bring value to your whole system:

- ✓ Review of your entire air monitoring & reporting system
- ✓ Expert analysis of data management, instrumentation & reporting workflows
- ✓ Tailored improvement recommendations
- ✓ Final report delivered to management
- ✓ Support that goes beyond the report

WHAT MAKES US DIFFERENT

- Fully Qualified, Multidisciplinary Audit Team
- Hands-on Support Beyond the Audit
- Customized Reports, Providing Insight and Direction to Support Compliance Goals
- Experts in CEMS, Regulatory Codes & QA/QC Systems

We don't just audit, we empower your team with insights to improve performance year after year.

ABOUT GLOBAL ANALYZER SYSTEMS

Founded in 1996, Global Analyzer Systems Ltd. is a leader in the emissions monitoring industry. We ensure safe and sustainable air by bringing certainty to emissions measurement. We provide a full complement of specialized and customized CEMS solutions and are committed to keeping industry compliant with regulations.
